Code UNDE0759
Size 1m x 10m (10m²)
Thickness 3mm

All the stability you need

The high density, fleece-backed natural rubber is extremely stable and prevents movement in your flooring, reducing wear and tear.

Shhh! Underlay at work

This is an underlay with real acoustic performance thanks to its thick materials, cutting down noise levels to make any room more comfortable.

Dry as a bone

Don't worry about moisture rising up from the sub-floor - the silver vapour barrier film protects your floor covering against damp.

With exceptional resistance to compression, you have the advantage of solid and stable support even under the heaviest weight.

Being dust free means it's cleaner and easier to install, with less clearing up afterwards.

TimberTech Pro's high tensile strength gives it superior performance in any installation.
